

DH602D

LINKVIL Hybrid DECT & Bluetooth Headset

Datasheet

LINKVIL DH602D Hybrid DECT & Bluetooth Headset is designed to meet demanding communication needs across diverse work scenarios, delivering stable connectivity and high-quality audio for professional collaboration. With both DECT and Bluetooth connectivity, users can move easily between computers, mobile devices, and VoIP phones to handle different communication needs. The headset features AI Environmental Noise Cancellation (AI ENC), supported by a three-microphone array, to help deliver clear and natural voice transmission in open offices and other noisy environments. A dual-sided visual busylight clearly indicates call status, helping users stay focused and reducing interruptions. Its lightweight design and replaceable ear cushions support comfortable extended use. With reliable connectivity and flexible device support, the DH602D is a practical choice for modern offices and remote collaboration.

Highlights

- Hybrid DECT & Bluetooth connectivity for flexible PC, mobile, and VoIP phone* workflows.
- Bluetooth 1-to-2 connection enables smoother switching between two Bluetooth devices.
- Pre-paired DT10 Dongle allows quick plug-and-play setup with PC or VoIP phone*.
- Stable DECT wireless performance keeps users connected while moving around the office.
- Stereo audio with 3-Mic AI ENC enhances both listening clarity and voice pickup in busy offices.
- Replaceable ear cushions and battery support easier maintenance and longer business use.

*Compatibility varies by VoIP phone model. See the compatibility list.
